

Disassembling Beaba Lutin night lamp

How to open it for repairs or battery swap

Written By: petur

Step 1 — Disassembly of the lamp

- The lamp opens up at the base: there are two smaller tabs next to the button, the semi-transparent plastic can be pressed in a bit with a knife, put a bit of paper inbetween to prevent the clip from snapping back. Next go with a knife towards one of the large tabs on the side until one side snaps out. Repeat for other side.

Step 2

- Remove the 4 screws (warning: 2x2 different types), out comes the pcb. Detach battery connector at the back.

Step 3

- remove two more screws to get at the battery

Step 4

- Overview of parts

To reassemble your device, follow these instructions in reverse order.
